NEC

Phones for Every Need

Choosing business telephones is a personal matter, depending on call volume, work setting, job requirements, and preference. That's why, at NEC, we offer a variety of Elite® IPK II phones designed to satisfy everyone's needs.

Our line of Elite IPK II phones extends from simple, two-button telephones without displays to our high-end multi-feature LCD models for the most demanding business environment.

Every one of our phones works on the Elite IPK II telephone platform, which has been proven reliable and secure over many years of operation.

NEC's family of phones for the Elite IPK II. [We're There For You, Answering Your Every Need.](#)

Agent Status

Most phones come in white or black. A multicolor and fully-customizable designation label template gives you the option of placing your corporate logo on every phone. In addition to our complete line of TDM and IP telephones, NEC Unified Solutions Inc. also offers Analog Cordless Telephones, Digital Cordless telephones, wireless telephones, and headsets. Optional French, Spanish and Braille dialpads available on many models. Certain features require optional equipment or specialized telephone company services. Please consult your authorized NEC Associate. The information herein is subject to change without notice at the sole discretion of NEC Unified Solutions, Inc.
