ATEL CloudConnect Hosted Phone Saves Your Money$

In today's fast paced and ever-changing business climate it's hard for most of us to keep on top of the latest technology. You want a local San Diego Company with 27 years in business to be your partner when you look for technology advice. It is our pleasure to introduce our newest offering, Atel Cloud Connect Hosted Phone Systems.

Cloud Connect uses the Internet to provide cloud based VOIP (Voice over Internet Protocol) phone services with multiple applications available. This approach is a very feature rich, cost effective voice and data application when compared to the traditional in house hardware based PBX system.

The Systems main features include:

- **Limited upfront capital expenditure**
- **Unlimited Local and Domestic Long Distance Calls**
- **Expanded Features - More for your money!**
- **Lower overall total cost of ownership (TCO) Fixed Monthly Cost**
- **Free Automatic Software Upgrades**
- **Better service delivery**
- **Swap Calls with Cell Phone or Use Follow Me Number**
- **Scalability - Add and move phones at will**
- **Easier to customize - Easy to Administer**
- **Users more productive**
- **Disaster Recovery Automatic Failover**

Hosted plans starting at

$29 /mo per line

Unlimited Local & Long Distance

If you are planning a relocation, expansion or upgrade, please contact Atel Cloud Connect for a no obligation evaluation and consultation. **Andrew Cohen or Jack Jecker 858-646-4600**

CLOUD HOSTED PBX

Run your business on the most stable hosted PBX system on the planet!
