

UNIVERGE® VM8000 InMail Solution

Fulfilling the promise of UNIVERGE®360

For today's small-to-medium size businesses (SMB), there is simply no place for long call-holding periods, incorrect call routing or lost messages. While organizations seek the right solution to address these issues, they also expect improved efficiency, economy and convenience.

VM8000 InMail is ideal for SMBs wishing to ensure that all callers get to the people and information that they need without prohibitive hold times or dropped calls. It provides digitally-integrated voice messaging capabilities and Automated Attendant features to meet a SMB's communication needs both now and in the future.

At a Glance

- An embedded solution for the UNIVERGE SV8100
- Improved customer satisfaction
- Increased employee productivity
- Intuitive user interface
- Simple installation, setup and maintenance
- Impressive Voicemail and Automated Attendant capabilities

Improved Customer Satisfaction

VM8000 InMail's robust Automated Attendant feature set ensures customer calls are routed to the appropriate people and answered quickly and efficiently. When customers call in, an instruction menu announcement plays to provide them a choice of dialing options. They can simply direct themselves to the called party without being placed on hold or having their calls dropped.

Increased Employee Productivity

Employees can also efficiently manage their calls and messages with easy one-touch access to voicemail features. With VM8000 InMail's advanced call processing capabilities, employees no longer need to manually direct and route callers. The Automated Attendant routes each incoming call based upon the time-of-day and day-of-the-week. The VM8000 InMail solution can even provide different announcements and dialing options for each number in the office.

Intuitive User Interface

The VM8000 InMail solution's interface is simple to learn and easy to use. Pre-recorded voice prompts offer a step-by-step guide on how to use all of the solution's features.

Simple Setup, Installation and Maintenance

VM8000 InMail is digitally integrated with the system's central processing unit to provide increased speed and accuracy to the voicemail system. Additionally, Windows®-based PC Pro enables online centralized HTML-based programming access. When employees use this intuitive browser-based software with its easy-to-follow wizards, programming time and mistakes are significantly reduced.

UNIVERGE360 is NEC's approach to unifying business communications. It places people at the center of communications and delivers on an organization's needs by uniting infrastructure, communications and business.
